I am passionate about IT. I am a team player and always aim for teamwork, code review, documentation, discussion whether it is a complex project or a project just for fun. My hobbies are Hackathons and IT events, where I exchange my experience with people and learn new professional and personal skills.

Education

- 01.09.2019–PRESENT
Master's Degree in *Computer Science*, **Technical University of Moldova**
- 01.10.2017–18.07.2018
University of Siegen, *Germany*, *Computer Science (Erasmus exchange)*
- 01.09.2015–28.05.2019
Bachelor's Diploma in *Computer Science* (Licentiate Engineer), **Technical University of Moldova**
- 01.09.2012–16.06.2016
Diploma of Professional Studies (Technician), **Financial Banking College**, *Speciality Informatics*

Experience

- 20.12.2018–PRESENT [GoParrot.ai](#)
Online Ordering Platform on *Microservices Architecture*. I worked on a service that synchronize database with partners *APIs* and reduced manual work from 1 week to 15 minutes. Now I work on new version of the Platform using *React-Native/ReactJS* with 40%+ code shared between mobile and web.

A big part of my professional experience comes from 35 Hackathons where I developed front-end/back-end/mobile apps and games. Also, I contributed to some open source projects.

- [mockingcase](#): I created and maintain a *Node.js* package that converts a string to `m0cKiNgCaSe`. Friendly documentation, unit tests, jsdoc and types for *TypeScript*. I write feature requirements and documentation, review pull requests and guide 15+ first-time contributors on open-source.
- [rebbe.io](#): I opened an issue on Github repo and using JavaScript and CSS, I converted *SVG static watch logo* into *Easter egg real-time clock*. The hardest part was understanding how SVG works.
- [spacebook](#): At [NASA Hackathon 2019](#) I and my team created a *Progressive Web App* which shows [Astronomy Picture of the Day](#) in an infinite scroll feed. A (not perfect) app that works by these days.

Check many other (fun and interesting) projects on my Github profile.

Skills

- Development: **JavaScript/TypeScript**(*proficient*), **Version control/GIT**(*proficient*), **HTML/CSS**(*working knowledge*), **Python**(*basic knowledge*), **ReasonML/Ocaml**(*basic knowledge*)
- Languages: **Romanian**(*native*), **English**(*fluent*), **Russian**(*fluent*), **German**(*beginner*)
